## Summary

As a passionate and dedicated software developer, I specialize in creating innovative solutions that bridge the gap between complex challenges and seamless user experiences. My expertise encompasses Oracle Digital Assistant (ODA), Oracle HCM, Large Language Models (LLMs), C2K (Conversation To knowledge) React.js, Node.js, MongoDB, Oracle Cloud, JavaScript, and REST APIs.

### Passion and Goals:

I am deeply passionate about staying at the forefront of technology trends and continuously enhancing my skills. My goal is to contribute to innovative projects that make a significant impact, while also growing professionally by taking on new challenges and responsibilities.

### Let's Connect:

I am always eager to connect with fellow professionals, potential collaborators, and industry leaders. Whether you have an exciting project in mind or just want to exchange ideas, feel free to reach out!

## Experience

### Junior Software Engineer

#### OMFYS

Jun 2024 - Present (3 months)

Delivered tailored chatbot solutions for leading banking institutions in India, enhancing customer interaction and satisfaction.

Elevated the intelligence and responsiveness of chatbots by implementing Generative AI and LLMs.

Extensively worked on Mobile App Integration; enhancing mobile user experiences by integrating Oracle Digital Assistant with iOS and Android applications.

Explored the possibility of Conversation to Knowledge (C2K) implementation for improving conversational intelligence and knowledge management through the implementation of Document Reader in Oracle Digital Assistant.

Developed APIs in client project thus highlighting expertise in developing and consuming REST APIs to support and implement robust backend services.

### System Engineer Trainee

#### OMFYS

Dec 2023 - May 2024 (6 months)

Created and deployed my own sophisticated AI chatbot with Oracle Digital Assistant (ODA), providing seamless integration with Web Channel, WhatsApp, Zoom and Microsoft Teams.

Explored the possibility of Generative AI Integration with ODA and incorporated a small piece into my Chatbot, thus reflecting willingness to explore and hunger to learn more.

Got my first client project within early days of my training period, showing the trust in abilities by senior management early in my career.

Crafted an in-depth technical documentation with solution centered around a potential security issue, highlighting Public exposure of Oracle Digital Assistant channel ID and secret key.

Explored Oracle Cloud Infrastructure (OCI) thus encompassing its fundamental principles and the art of developing chatbots utilizing this platform.

## Education

### **Maharshi Dayanand University**

Bachelor of Technology - BTech, Computer Science

Aug 2018 - Dec 2022

- Engaged in World Robot Olympiad (WRO) as a volunteer and judge during my second year at Maharshi Dayanand University.
- Developed leadership, teamwork, and communication skills while contributing to event organization and project evaluation.
- Gained hands-on experience in robotics, enhanced my understanding of STEM education, and expanded my professional network.

## Licenses & Certifications

### **MERN Stack Development - JSpiders - Training & Development Center**

BTR/JSP/01/11

### **Oracle Digital Assistant Platform 2022 Solution Engineer Specialist - Oracle**

## Skills

Generative AI • Large Language Models (LLM) • Oracle Cloud • Oracle HCM • Oracle Digital Assistant  
• NoSQL • JSON Web Token (JWT) • React.js • Emailjs • MongoDB
